

# DATA ENGINEERING

A sentiment Analysis Project

Hanaa Louatib, Leana Neuber & Lilia Cherif

Master-II Big Data & Machine Learning

Demo

Project  
Management

Presentation of  
our project: A  
sentiment analyser

Our Machine  
Learning Model

Our User Interface

Docker and its aim

# Summary

# Demo

Let's run our app

Get your test sentence ready!

# Project Management

## CODE MANAGEMENT

- New branch for each feature
- Using pull requests to assure better code quality

## TASK MANAGEMENT

- Ensures tasks division and project advancement
- Four columns: To do, Doing, To be reviewed, Done

# A sentiment analyser

- In the form of an app
- Running through a web interface
- Returning sentiment: positive, neutral, negative
- Text  $\longrightarrow$  Sentiment : Machine Learning Model
- App format for distribution: Docker Image

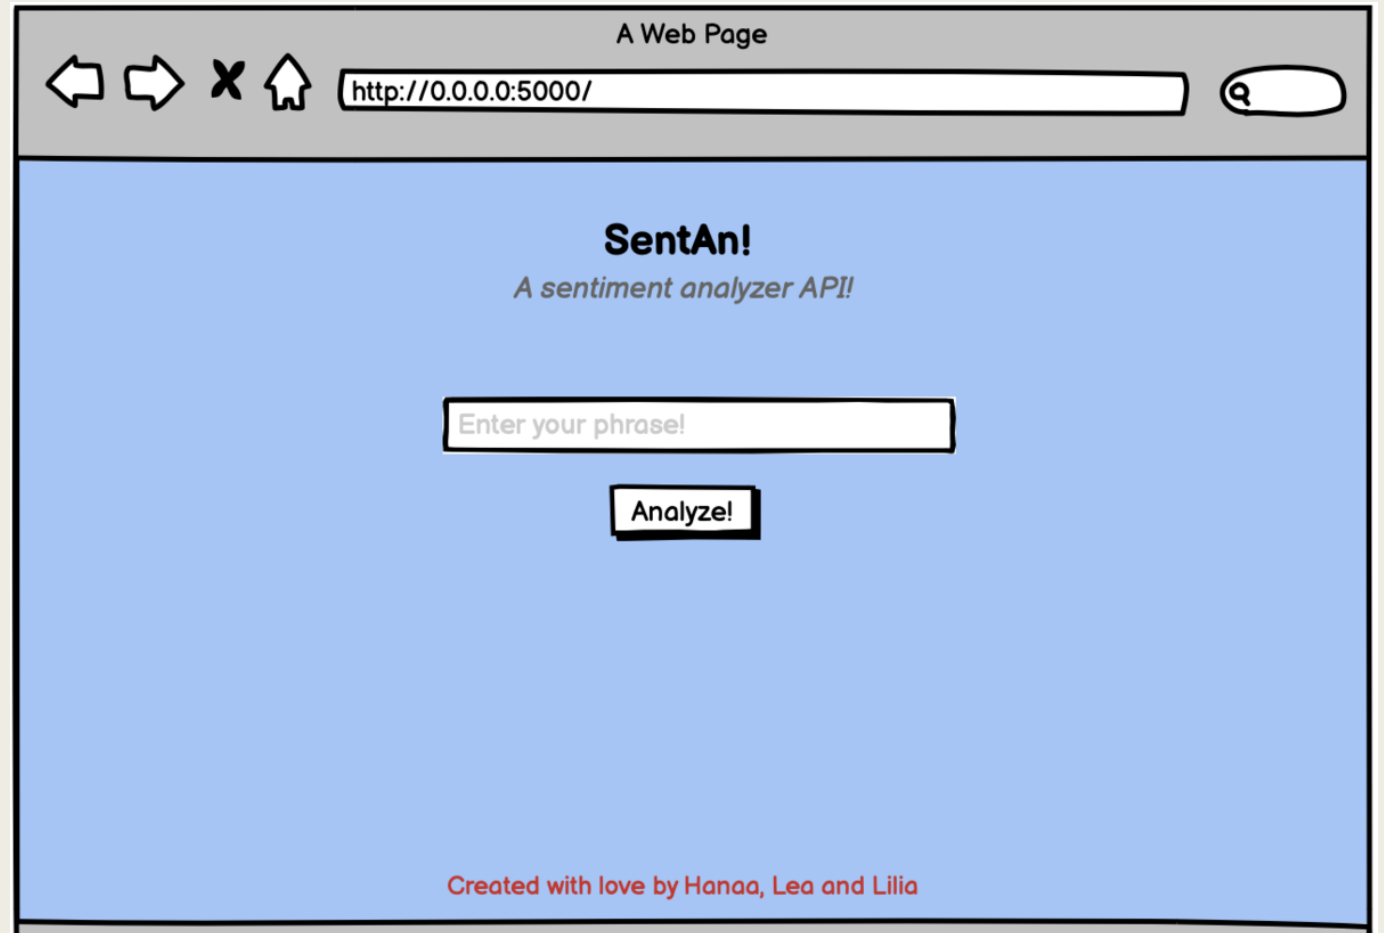

- Dataset : Amazon Reviews
- Cleaning :
  - *VADER sentiment analysis : mapping lexical features*
- Using SVM for prediction
- Reached accuracy : 85%

# Machine Learning Model

# Frontend and user views

- App available through a web interface
- After running the Docker : <https://localhost:5000/>
- Using HTML and CSS
- Four different views

# Docker and its aim

- Sentiment Analysis App running through a Docker Image
- Working on a DevOps environment
- Two containers : App & Redis
- Redis : fast and persistent
